Print on wrapping: (face) モンテルカスト錠 5mg「CEO」, モンテルカスト, 5mg (back) MONTELUKAST5mg「CEO」, モンテルカスト, 5mg, CEO145

Effects of this medicine

This medicine suppresses bronchoconstriction by inhibiting the action of leukotriene. It prevents episode of bronchial asthma such as cough, wheezing and breathing difficulty. In addition, it controls nasal ventilation resistance etc. and improves symptoms of allergic rhinitis such as nasal congestion, nasal discharge and sneezing.

It is usually used to treat bronchial asthma and allergic rhinitis. In asthma, it is effective for preventing an asthma attack, not for stopping an asthma attack that has already developed. Use other medicine to stop an asthma attack.

Before using this medicine, be sure to tell your doctor and pharmacist

- If you have previously experienced any allergic reactions (itch, rash, etc.) to any medicines.
- If you are pregnant or breastfeeding.
- If you are taking any other medicinal products. (Some medicines may interact to enhance or diminish medicinal effects. Beware of over-the-counter medicines and dietary supplements as well as other prescription medicines.)

Dosing schedule (How to take this medicine)

- Your dosing schedule prescribed by your doctor is((to be written by a healthcare professional))
 - For bronchial asthma: In general, for adult, take 2 tablets (10 mg of montelukast) at a time, once a day before bedtime.
For allergic rhinitis: In general, for adult, take 1 to 2 tablets (5 to 10 mg of montelukast) at a time, once a day before bedtime.
- In any case, strictly follow the instructions.
- If you miss a dose, take a dose as soon as you remember. However, if it is almost time for the next dose, skip the missed dose and continue the regular dosing schedule. You should not take two doses at one time.
 - If you accidentally take more than your prescribed dose, consult with your doctor or pharmacist.
 - Do not stop taking this medicine unless your doctor instructs you to do so.
